

Business Continuity Services

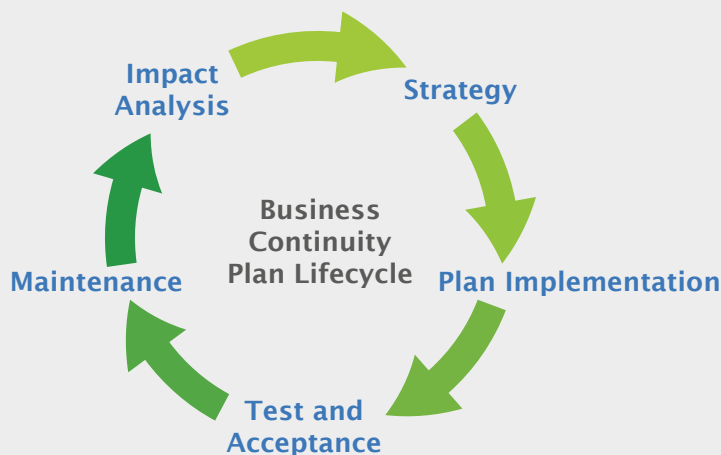

Develop a Business Continuity Plan that maintains normal business operations and workforce productivity from any disruption.

Overview

Business continuity is vital to the success of your business. Whether the business disruption is the result of natural disasters, technology failures or criminal acts, proactive preparation and a sound Business Continuity Plan can ensure continuous operation and quick recovery.

eContinuity specializes in the development of customized business continuity plans and services. We focus on both the tactical and strategic needs of our customers, by understanding their business requirements, and shaping plans accordingly. For small to mid size companies we can provide you with all of the business continuity planning services you need. For large corporations with FTE's we can supplement your existing staff during key periods.

Business Impact Analysis

A Business Impact Analysis (BIA) identifies your key business processes, supporting technology and partners and the impact that a disaster event has on your business over time in terms of revenue loss, customer service impact, regulatory impacts, and reputation.

Business Continuity Components

Below are some of the key areas that are covered within our Business Continuity Planning Program.

- Business continuity strategy options
- Full plan development, documentation and implementation
- Crisis management team plan
- Plan, testing and coordination
- Test scope, test results, documentation and reporting
- SEC, NASD, FFIEC, Audit and SOX compliance regarding business continuity
- Creation of ad hoc business continuity documentation upon request
- On-Call availability to help manage a business continuity event
- Day to day support and guidance regarding business continuity questions and issues
